Reducing opacity

LOGO & TAGLINE

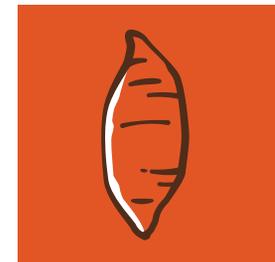

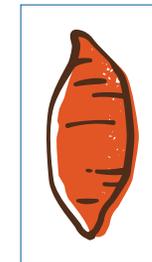

THE POTATO

In certain instances – such as for avatars and email signatures – the potato portion of the logo is used as a shortened format of our brand logo. The usage of the lone potato has a clearspace that differs from that of the full logo.

The minimum space around the potato is indicated by 1/4 of the potato's width

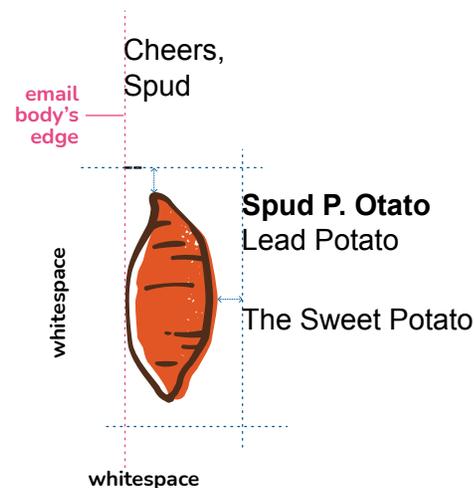

Hence, the image provided to external entities should look like these examples

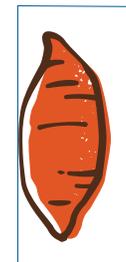

EXCEPTIONS

There will situations where clearspace is omitted from one or more sides of the potato, such as in a left-aligned digital layout where the potato is positioned flush against the edge.

In this example of an email signature, the left whitespace should be excluded in the image export.

The image export should look like this:

TYPOGRAPHY

BOURTON BASE

Our primary display typeface is modern with a subtle industrial feel. It's bold, welcoming, and goes well with everything! For typographic art, Bourton can be customized and embellished in endless ways, such as adding strokes, typing on a curved path, warping, skewing, or layering. Its legibility at smaller sizes also makes it ideal for subheadings.

*SPACING APOSTROPHES AND HYPHENS

This typeface's apostrophes and hyphens have bad optical placement which require adjustment of tracking and baseline shift. A baseline shift of -2 and attention to surrounding characters is usually sufficient for offsetting this.

TYPOGRAPHY

JACKPOT ITALIC

A whimsical and psychedelic typeface that references and sounds and vibes of the late 60s, Jackpot adds an airy and quirky twist when it's needed for merch, online content, and those extra-special seasonal fruits.
